

Practical – 3

Object: WAP to find the number of arguments provide at run time.

Program:

ArgumentCounter.java

```
class ArgumentCounter
{
    public static void main(String []args)
    {
        int count=args.length;
        System.out.println("Number of arguments provided at runtime= "+count);
        System.out.println("And these arguments are: ");
        for(int i=0;i<args.length;i++)
        {
            System.out.println(args[i]);
        }
    }
}
```
