

# **Practical – 1**

**Object:** WAP to find the average and sum of the N numbers using command line argument.

**Program:**

**Sum\_Average.java**

```
class Sum_Average
{
    public static void main(String []args)
    {
        int i,avg,sum=0;
        for(i=0;i<args.length;i++)
        {
            sum+=Integer.parseInt(args[i]);
        }
        avg=sum/args.length;
        System.out.println("Sum of "+args.length+" numbers= "+sum);
        System.out.println("Average of "+args.length+" numbers= "+avg);
    }
}
```
